COMPANY PROFILE

Precision is our profession

Manufactures of Press tools & Components, Sheet metal fabricators, SPM ,Agro-machinery Assemblies and EV Chassis Components

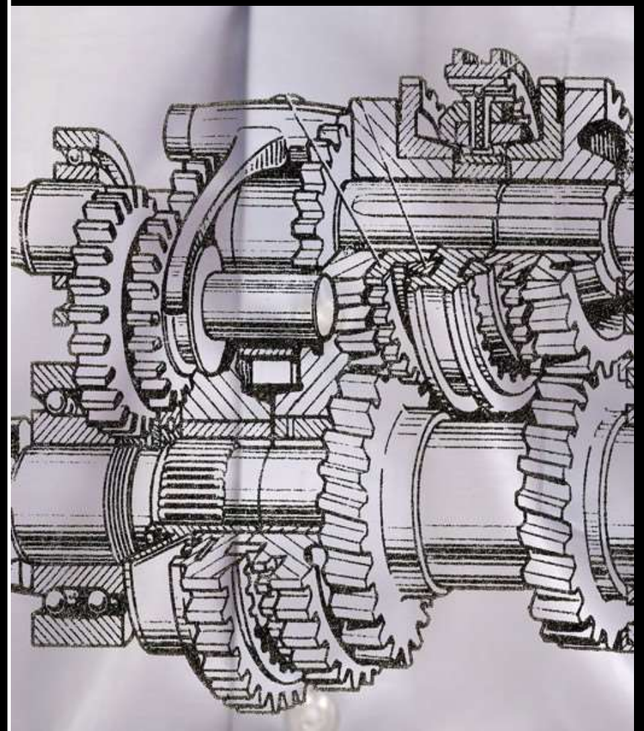
WELCOME TO OUR COMPANY

LEARN MORE

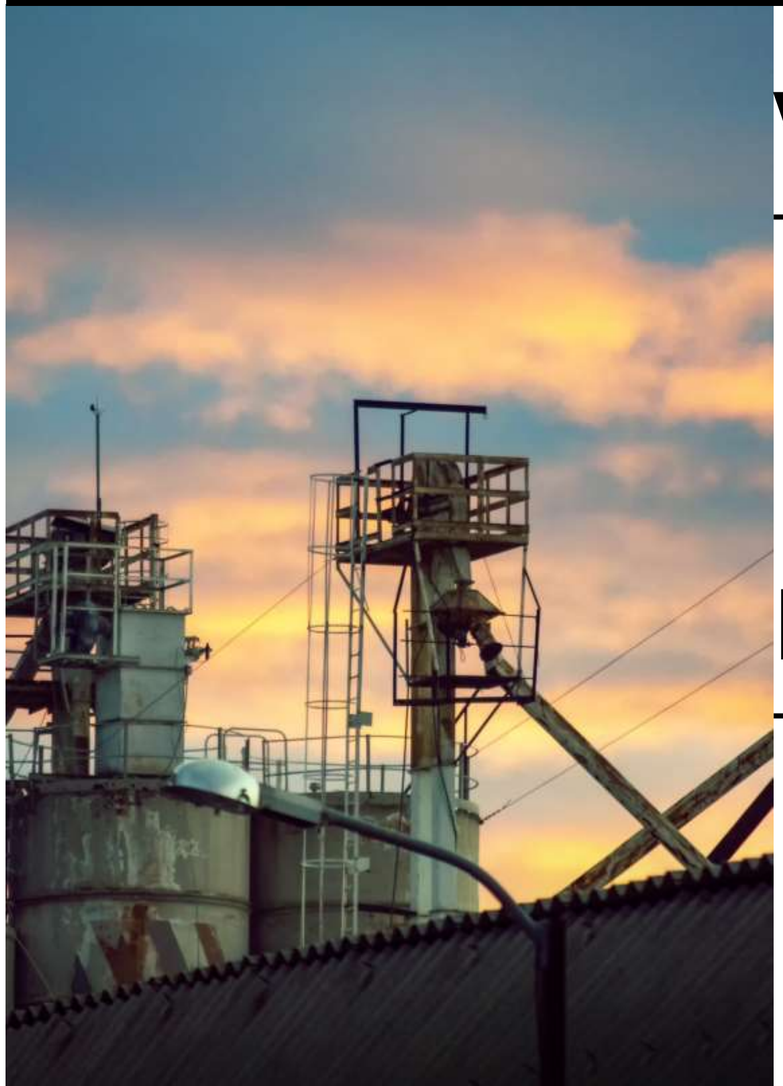
Who We Are: MSR Engineering Works, established in 1991, is a leading manufacturer specializing in precision press tools and components. With over three decades of experience, we've built a reputation for excellence, innovation, and superior customer service.

What We Do: We deliver high-quality, reliable manufacturing solutions tailored to your needs, whether it's large-scale production or custom-engineered components.

How We Can Help: Our expertise, cutting-edge technology, and commitment to continuous improvement ensure cost-effective solutions, making MSR Engineering Works your trusted partner for precision and efficiency.



VISION & MISSION



Vision

"Our Vision – 2030: To be a leading name in precision sheet metal manufacturing, recognized for delivering high-quality, innovative, and reliable solutions by establishing 2 more technologically advanced manufacturing units by 2030. We at MSR Engineering Works, strive to exceed customer expectations, build enduring partnerships, and drive sustainable growth through engineering excellence and advanced manufacturing technologies."

Mission

Our mission is to deliver superior products and services by leveraging cutting-edge technology and skilled craftsmanship. We are dedicated to providing innovative solutions, timely delivery, and exceptional value, all while maintaining the highest standards of quality and safety in everything we do.

ABOUT OUR FOUNDER

Mr. T.M. Sundarrajan founded MSR Engineering Works in 1991. With a passion for precision and innovation, he grew the company from humble beginnings into a trusted industry leader known for quality and reliability.

ABOUT OUR CURRENT LEADER

Mr. Sai Mahesh M S, with a Mechanical Engineering degree from PESIT, Bangalore and an MBA from Leeds Business School, UK leads the company today. He combines modern strategies with traditional values, ensuring growth, innovation, and employee welfare.

ABOUT OUR TEAM

A skilled team of 25+ professionals, each with an average of 12 years of experience, continuously delivers high-quality products and innovative solutions, staying ahead of industry standards.

KEY MILESTONES

KEY MILESTONES & CLIENT VALUE

- 1991: MSR Engineering Works was founded, establishing a foundation in precision manufacturing with a focus on quality and innovation.
- 2000: Expanded with high-capacity press machines, enabling us to take on larger, more complex projects.
- 2004: Acquired a 22,000 sqft industrial facility, increasing our production capacity and infrastructure for large-scale orders.
- 2010: Diversified into Special Purpose Machinery (SPM) and agro-machinery production, expanding our service offerings.
- 2017: Achieved ISO 9001:2015 certification, reinforcing our commitment to meeting international quality standards.
- 2020-present: Ongoing upgrades to our facility and equipment to enhance our production capabilities and meet the evolving demands of our clients.

MACHINERY AND INFRASTRUCTURE TIMELINE:

KEY FIGURES

- 1991-1996: Initial MSME setup with one hydraulic press and lathe machine.
- 1997-2002: Installed high tonnage press machines and established a dedicated tool room.
- 2003-2010: Purchase of 22,000 sqft Industrial land of which 6000 sqft is currently occupied for in-house industrial activity and additional machinery.
- 2011-2017: Upgrades to production facility and introduction of QMS ISO 9001:2015,
- 2018-2022: Additional of new machinery such as Shearing and Bending machines to expand manufacturing scope
- 2024 :Currently expanding workspace from 6000 sqft to 9000 sqft, with a focus on dedicated assembly area

DEMONSTRATED GROWTH AND RELIABILITY:

- Consistent Turnover Growth: Over the past five years, MSR Engineering Works has shown steady growth in turnover, reaching and exceeding our tagets every fiscal year. This reflects our ability to handle larger projects and increasing demand for our products and services.
- Manpower Expansion: Our workforce has grown from 14 staff members to 26, demonstrating our commitment to scaling operations to meet client needs while ensuring we maintain a highly skilled team.
- Increased Machinery Capabilities: From 19 to 25 machines, our expanding infrastructure ensures we can manage high-volume and complex manufacturing processes efficiently.

OUR SCOPE OF WORK

MSR Engineering Works specializes in the design, development, and manufacturing of high-precision press tools, Press components along with additional service scope such shearing and bending services, labour support for specialised assemblies etc.

Our expertise covers:

- Press Tools: Custom-designed and machined to meet high-volume production needs with precision and efficiency.
- Press Components: Manufactured from a range of materials such as Mild Steel,Stainless Steel, Brass etc with exacting standards.
- Sheet Metal Fabrication: Including Laser cutting, shearing, bending, and assembly with various surface finishes.
- Chassis Manufacturing: We manufacture chassis for EV buggy's of various seating capacities for a industry leading customer.
- Agro-Machinery Assemblies & Silo infra production: Production and assembly of agricultural equipment and components along with manufacturing conveyor systems , chutes and infrastructure items for SILO's

ABOUT OUR MACHINERY

MSR Engineering Works is equipped with a comprehensive range of advanced machinery to support high-precision manufacturing and ensure superior quality in all our products. Our facility includes:

- Press Machines:
  - Power Presses (10 to 200-ton capacity)
  - Fly Press (1to 10 ton)
  - Bending Machine (Upto 3 mts wide and 6mm thickness)
  - Shearing Machine (Upto 3 mts wide and 6mm thickness)
- Tool Room Equipment:
  - Surface Grinding Machine
  - Milling Machine with DRO
  - Drilling Machines
  - Power Hacksaw Machine
  - Bench Grinding Machine
- Production Machinery:
  - Sheet Rolling Machine
  - Automatic Pipe Cutting Machine
  - Coil Straightener Machine
  - Laser Cutting machines (3kw , 4 mtrs x 2 mtrs size)
  - CNC bending Machine (4.3 Mtrs / 200T)
  - Radial Drilling Machine
  - Pneumatic Feeders (various capacities)
  - Coil Cradles and Recoilers
- Welding and Fabrication Tools:
  15KVA Spot Welding Machine
  250 AMPS TIG Welding Machines
  CO2 Welding Machines
  Semi-Automatic Box Strapping Machine

- Precision Instruments:
  Digital Vernier Calipers (0-200mm, 0-300mm)
  Micrometers (0-25mm, 25-50mm)
  Plating Thickness Measuring Gauge
  Thread Plug Gauges (various sizes)
  Digital Vernier Height Gauge
  Surface Plate (400x400mm)
  Dial Gauge and Microscope

- Additional Equipment:
  25KVA DG Set
  5 HP and 10 HP Compressors
  Hand Grinding, Drilling, and Buffing Machines
  Hand Pallet Truck
  Electronic Weighing Machines (3kg and 300kg)
  5 Ton crane (awaiting installation)

Our facility also includes clearly designated zones for inspection, tool room operations, press shop activities, and assembly areas, ensuring efficient workflow and quality control. All machinery undergoes regular maintenance and upgrades to meet industry standards and client requirements.

Press Tools & Components

SPM & Agro-machinery

NGO products

As part of our commitment to give back to the society in collaboration with an NGO in 2018 We conceptualized , designed and delivered International Standard Cycle Parking Infrastructure installed at Church street and Inaugurated by Former CM of Karnataka Shri Siddaramaiah Ji. This was aimed at motivating people to switch to alternative and greener mode of transportation.

WITH COBBLESTONES & CYCLE STANDS, ALL-NEW CHURCH ST TO OPEN TODAY

PUSHKAR V | Bengaluru

THE new cobblestoned Church Street (from Brigade Road to St Mark's Road) Will finally be thrown open to the public on Thursday After missing several deadlines, the model road is ready. When asked if the road will be made vehicle free, M Lokesh, Executive Engineer, BBMP said, "We have not decided on making the road vehicle-free as yet. We will explore any possibility on those lines."

The street is paved in-kind with patterned cobble stones, ample space for pedestrians, and music and solar powered street lights.

While the direction of vehicular movement all remain the same as earlier with one-way traffic from Brigade Road to Museum road, two-wheeler parking bays have been created along the stretch.

While people and commercial establishments are excited about the opening of the street, cyclists too have something in store. NGO Arjuna has installed 38 cycle stands across in the shape of chess pieces, skateboards, among others. Each stand can accommodate two cycles. An eight-member team has designed the stands. Speaking to Express, Vinay Kumar, Head of Technology, Arjuna, said, "With the help of art we want to encourage people to use cycle."

M Lokesh, Executive Engineer, BBMP said, "With these unique cycle-stands we want to attract and encourage people to use cycles" he said.

OUR CUSTOMERS

MSR Engineering Works is honored to serve a broad spectrum of industry leaders, providing high-quality components and solutions. Our key customers include:

- TVS Motor Company (via Supangita Engineers Ind Pvt Ltd): High-precision automotive press components.
- Fowler Westrup India: Specialized components for agricultural machinery, conveyor systems and SILO infrastructure.
- Mecwin Technologies: Components for EV motors and solar pumps.
- Orizin Technologies: Retail products for baby bed safety rail guards and pet gates.
- Virya Mobility: Infrastructure components for electric vehicles.
- Palis Eco Vehicles : EV Buggy Chassis Manufacturing
- Aditya Auto Products: Automotive parts and assemblies.
- Shobha Globs India Pvt Ltd: Industrial solutions and machinery components.
- Nash Industries: Precision sheet metal components.
- Welfabs India Pvt Ltd: Custom fabrication and engineering solutions.

We take pride in our partnerships, consistently delivering excellence and reliability to meet the diverse needs of our valued customers.
